Profile

Frontend Developer with 1+ year of experience building responsive, scalable, and user-centric web applications. Proficient in HTML, CSS, JavaScript, TypeScript, React.js, Tailwind CSS, Bootstrap, and REST API integration. Experienced in developing reusable UI components, optimizing application performance, and collaborating in Agile teams. Passionate about writing clean, maintainable code and delivering high-quality user experiences.

Education

MODI INSTITUTE OF MANAGEMENT & TECHNOLOGY, KOTA

- Bachelor of Computer Application (B.C.A.) 2022 – 2025
- Higher Secondary Education - ADARSH SR SEC SCHOOL KOTA, RAJASTHAN 2021 – 2022

Technologies

Programming Languages: C, C++ , JavaScript

Frontend Technologies: HTML, CSS, JavaScript, React, Bootstrap

Tools & Others: VS Code, Github, Bootstrap, MongoDB, Chrome DevTools, Responsive Web Design

Experience

Software Engineer | Stonestry

OnSite | Mar 2026 – Present

- Contributed to the development of enterprise ERP modules using the MERN stack, building solutions for Production, Pricing, Quality Control, Wooden Crates, FG Store, and Stone Purchase Management.
- Designed and optimized scalable REST APIs and React interfaces supporting 200+ active users with centralized real-time data management.
- Independently developed the Store Consumables module from scratch, digitizing indent tracking and automating inventory workflows handling 13,500+ monthly item transactions.
- Improved procurement efficiency, inventory visibility, and operational workflows by implementing business logic, workflow automation, and performance optimizations.

Projects

Shemor

07/2026

- Developed a scalable full-stack web application using React, TypeScript, Tailwind CSS, Vite, and Supabase (PostgreSQL).
- Built reusable and responsive UI components, implemented client-side routing, and integrated secure authentication and database operations.
- Optimized application performance, maintainability, and deployment readiness by following modern development practices and configuring deployment with Cloudflare Workers/Pages.

Daily Task

06/2026

- Developed a full-stack task verification system with secure JWT authentication and role-based access control (Student, Teacher, Admin).
- Integrated Cloudinary and Multer for secure multi-image uploads and implemented password recovery using security questions.
- Enhanced security with Helmet, API rate limiting, and NoSQL injection protection while delivering a responsive UI

Full Website Modules

02/2025

- Full Website Modules Built and maintained entire website modules using HTML, CSS, JavaScript, jQuery and Bootstrap, focusing on scalability and performance.
- Implemented UI/UX best practices, resulting in intuitive and visually appealing interfaces.
- Integrated third-party services and APIs using Ajax, enhancing the functionality and user experience.
- Developed on demand landing pages for new campaigns considering all UI/UX principles.

Basic-calculator

01/2025

- A modern, dark-themed calculator with smooth, rounded buttons, built using HTML, CSS, and JavaScript.
- Supports basic arithmetic operations, responsive design, keyboard input, and clean animations for an intuitive and visually appealing user experience.
